Art Unit:

Claims 1-20 are presented for examination.

Claims 10 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 10 and 11 are indefinite in using a parenthesis which fails to clarify if the subject matter in the parenthesis is part of the claim or not.

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103 as being unpatentable over Levy et al. (U.S. Patent 5,798,349).

Levy et al. Teach the use of green porphyrin in a photodynamic therapy for the treatment of conditions of the eye associated with unwanted neovasculation and macular degeneration. See the claims. The fluence, the wavelength and the dosage is taught in page 5, paragraphs 11-15 and examples of Levy et al. The above reference differs from the claimed invention in the interval of administration. It would have been obvious to a person skilled in the art to determine the appropriate interval for administration in the absence of evidence to the contrary.

One skilled in the art would have been motivated to employ the teachings of the above reference, since it relates to the use of the claimed compounds with the limitation of dependent

claims for the treatment of conditions associated with ocular neovascularity and macular degeneration. The determination of proper interval for administration is considered to be within the skill of artisan in the absence of evidence to the contrary. Applicant has presented no evidence to establish the unexpected or unobvious nature of the claimed invention, and as such, claims 1-20 are properly rejected under 35 U.S.C. 103.
